THE ACC/ACC FOUNDATION DEI MATURITY MODEL

What is the DEI Maturity Model?

The ACC/ACC Foundation DEI Maturity Model is based on the framework that was developed for the ACC Legal Operations (LOPS) Maturity Model. A widely used and celebrated reference tool, the LOPS Maturity Model is used by legal department leaders around the world to benchmark maturity in a wide range of functional areas that are relevant for optimization of legal services delivery. This first iteration of the ACC/ACC Foundation DEI Maturity Model follows the same blueprint, outlining clear descriptions for three levels of maturity for each DEI function – early, intermediate, and advanced – providing leaders with a critical snapshot of where their department is currently and a roadmap of how to achieve future goals.

The DEI Maturity Model is a living tool, developed by ACC and the ACC Foundation, in consultation with an advisory committee of DEI experts from the legal and business communities. That said, we hope this document continues to be refined and improved based on the valuable feedback from those who use it.

## DEFINITIONS

---

**Diversity** is the variety ways and circumstances, both visible and invisible, that groups of people differ from each other.<sup>1</sup>

**Equity** is the guarantee of fair treatment, access, opportunity, and advancement for all while striving to identify and eliminate barriers that have prevented the full participation of some groups. The principle of equity acknowledges that there are historically under-served and under-represented populations and that fairness regarding these unbalanced conditions is needed to assist equality in the provision of effective opportunities to all groups.<sup>2</sup>

**Inclusion** is an environment that makes the most of diversity. Everyone feels welcome and like they belong. They have opportunities to contribute and are accepted.

**Governing Body** is the entity that takes responsibility for coordination and oversight of the DEI strategy, including decision-making about goals, metrics, resource allocation, and more. It delegates extensively to local or

functional groups, while also holding them accountable for results.

**Metrics** are measurements that are used to assess progress, and ultimately, results of a company's DEI program.

**Sponsor** is a senior executive who uses their position and power to advance a more junior person's career by "opening doors" to opportunities for visibility, exposure, stretch assignments, etc. A sponsor is an advocate who takes action.

**Mentor** is a senior person who provides coaching to support the mentee's performance, inclusion, and professional development. A mentor is an advisor who may or may not take action.

**Employee Resource Group (Affinity Group)** is a group of coworkers who share characteristics or life experiences.
